

Integrate MYLAPS results in your website

- Log in into your MYLAPS account
- Go to the Control Panel and click on "Get Results from Mylaps.com Integrated into Your Website."

The screenshot shows the MYLAPS control panel interface. On the left sidebar, under 'MyLaps Harald', the 'Control Panel' link is circled in red. In the main content area, under the heading 'Mylaps.com control-panel', the 'Get Results from Mylaps.com Integrated into Your Website' option is also circled in red. Other visible options include 'Upload Results', 'Live Practice Results', and 'Extra Features'.

- Copy the code in the frame into your website

The screenshot shows the MYLAPS control panel with the 'Get Results from Mylaps.com Integrated into Your Website' option selected. A text area contains the following JavaScript code:

```
<script type="text/javascript">
<!--
mylaps_member_id = 109300;
mylaps_key = 'e7b62a4fa8248596651ad54dbf660f23';
mylaps_language = 1;
mylaps_event_id = 0;
mylaps_run_id = 0;
mylaps_type = 'events';
mylaps_page_size = 15;
mylaps_showlinks = true;
-->
</script>
<script type="text/javascript" src="http://www.mylaps.com/co/mylaps.js"></script>
```

Below the code, a list of variables and their descriptions is provided:

- mylaps_language**: The language is automatically set to the current language.
- mylaps_page_size**: Page size of the events page (should be between 5 and 25).
- mylaps_showlinks**: Enable links to the events from the events page (should be true or false).
- mylaps_type**: Should be 'events' (default), 'event' or 'run'.
- mylaps_event_id**: If mylaps_type is set to 'event' the event with this id is shown on the integrated page.
- mylaps_run_id**: If mylaps_type is set to 'run' the run with this id is shown on the integrated page.

A note states: "The eventid and runid can be found in the links from the events page to the event page and in the links from the event page to the run page."
